Showing data sets with "missing-data" tag

Data sets with missing values

Name	Description	Rows	Columns	Tags
Brittleness index (/info/brittleness-index)	A plastic product is produced in three parallel reactors (TK104, TK105, or TK107). For each row in the dataset, we have the same batch of raw material that was split, and fed to the 3 reactors. These values are the brittleness index for the product produced in the reactor.	15	3	multivariate (/tag/multivariate) missing-data (/tag/missing-data) paired (/tag/paired)
Class grades (/info/class-grades)	Grades from a Chemical Engineering course at McMaster University.	99	6	multivariate (/tag/multivariate) missing-data (/tag/missing-data) regression (/tag/regression)
Food consumption (/info/food-consumption)	The relative consumption of certain food items in European and Scandinavian countries. The numbers represent the percentage of the population consuming that food type.	16	20	multivariate (/tag/multivariate) missing-data (/tag/missing-data)
Kamyr digester (/info/kamyr-digester)	Pulp quality is measured by the lignin content remaining in the pulp: the Kappa number. This data set is used to understand which variables in the process influence the Kappa number, and if it can be predicted accurately enough for an inferential sensor application.	301	22	multivariate (/tag/multivariate) missing-data (/tag/missing-data) time-series (/tag/time-series)
Raw material	Measured			

Name	Description	Rows	Columns	Tags

Raw material properties (/info/raw-material-properties)	Measured characteristics of several batches (lots) of plastic pellets.			multivariate (/tag/multivariate)	missing-data (/tag/missing-data)
Travel times (/info/travel-times)	A driver uses an app to track GPS coordinates as he drives to work and back each day. The app collects the location and elevation data. Data for about 200 trips are summarized in this data set.	205	13	multivariate (/tag/multivariate)	missing-data (/tag/missing-data)
